ARMOR TECHNOLOGY 2014

International forum for
Combat Vehicle professionals

armourforum.com

The Armour Technology 2014 International forum provides armour professionals an insight into the latest trends in combat survivability and force protection.

Topics to be covered at Armour Technology 2014 include:

- Evolving Challenges in Asymmetric Warfare
- Anti-armour Capabilities
- Advanced armour technologies
- Surviving Blasts: Mines and IEDs
- Beyond Armour: Hard kill and Hit avoidance
- Maintaining a credible Combat Force

Armour Technology 2014 symposium addresses leading experts from military services, prime contractors, integrators, OEMs as well as scholars and researchers from the world's leading R&D and academic institutions. Access to the online symposium will be by invitation.
